Model Intelligence

Performance comparison of machine-learning models.

Your actual Logistic Regression, KNN and Decision Tree evaluation results will be displayed here.

Models Used

	Model	Purpose
0	Logistic Regression	Baseline classification model
1	K-Nearest Neighbors	Distance-based classification
2	Decision Tree	Tree-based classification

Evaluation Metrics

- Accuracy
- Precision
- Recall

Understand which transaction characteristics are important for anomaly classification.

Feature-level model explanations such as SHAP will be connected after the final model is selected.

Transaction Feature Relationships

Feature Correlation Matrix

Transaction Explorer

Search, filter and investigate transactions from the dataset.
